

# PLAYONCLOUD

Streaming Freedom is Here.

## About PlayOn Cloud

PlayOn Cloud is a mobile app for iOS and Android that allows you to record your favorite streaming shows and movies in the Cloud (no PC required) and download them to any device to watch anywhere anytime – even when you're offline.

## Key Features

### Download Anything

Record streaming shows and movies from services like Netflix, Hulu, and Prime Video in the cloud. Then, auto-download them to any mobile device or computer – even "non-downloadable" titles from the native apps.

### Watch Without Data

Download your PlayOn Cloud recordings over Wi-Fi to any mobile device, tablet, or PC. Watch anytime, anywhere – no data required. You can also restrict downloads to Wi-Fi or set an off-peak window to manage your data usage. Download to your Android TV and watch in any room any time. Start in one room, resume in the next.

### Watch On Your Big Screen In 1080p

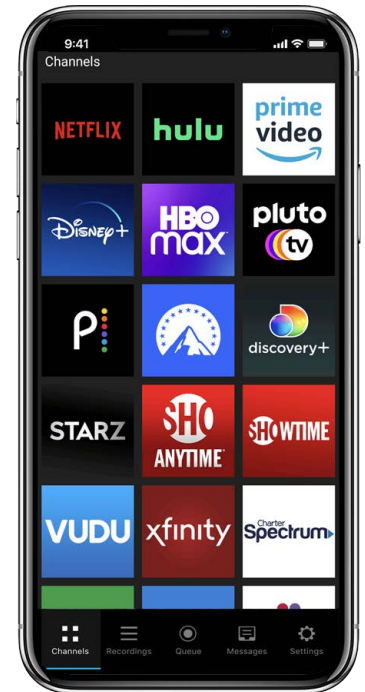

Choose from SD, HD or FHD when you record. You can cast recordings to your TV with a Roku, Chromecast or Fire TV. Record in 1080p and watch in Full High Definition on your TV anytime, without using bandwidth.

### Skip The Ads

When you record a show, you can play it back ad-free and enjoy a seamless watching experience.

### PlayOn Cloud Channels:

PlayOn Cloud comes with over 25 channels, including:
